

# Green Tips at Home

Small changes can add up to  
big climate change

# Did you know?

Only 10% of the energy used by an incandescent bulb produces light; the rest is given off as heat. Compact fluorescent lightbulbs (CFLs) are up to **four times as efficient** as incandescent bulbs.

A leaky faucet that fills a coffee cup in 10 minutes will waste an estimated 3,000 gallons of water per year.

Generating enough electricity to cook for an hour in a standard electric oven creates 2.7 pounds of CO<sub>2</sub>. A toaster oven creates 1.3 pounds over 50 minutes; a microwave creates 0.5 pounds over 15 minutes.

# **Planning for Home Recycling**

# Planning for Home Recycling

- Recycling more at home does not require much effort if you spend some time to create a comprehensive recycling system.
- This system starts with having places to store your recycled materials in the house, whether this is a box, bin or bag.
- Keep the recycling container next to the trash can and will remind everyone to recycle as much as possible.

# Planning for Home Recycling

01

Find out what you  
can recycle

- Make a list
- find a handy place to store them
- encourage everyone in your house to think whether items can be reused or recycled before they're thrown away.

02

Recycle on your  
doorstep

- Set a recycling box or bag at home
- Ready to throw into collection bins

03

Check the date of  
recycling event in  
the community

- Mark the date on the calendar

**02**

# **Method of Recycling**

# Method of Recycling

- Flatten cardboard boxes so that you can fit more recyclables into your bin.
- All plastic bottles can be recycled, from water bottles to salad dressing, so put all of them in your recycling container.
- It is not just newspapers that you can recycle at home. Also, recycle wrapping paper, envelopes, birthday cards and phone books. All sorts of cardboard can be recycled, too, even toilet and paper towel tubes.

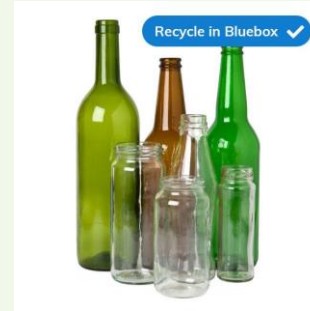

# Method of Recycling

- Most metallic items in the home can be recycled, such as empty spray cans and tin foil, and of course, all empty soda, fruit, vegetable and other food cans.
- Keep a space in your cupboard so that you can recycle as you are cooking or cleaning. It will make it easier for you to put the recyclables in their proper place.
- When going out, stop at your local recycling center and drop off anything that was not picked up by your curbside service. This lets you fit your recycling into your life, and will also teach your children about the importance of recycling.

# Method of Recycling

- Glass can be recycled endlessly so be sure to always recycle your glass bottles and containers
- To help your recycling center and to keep down foul odors, make sure you wash food waste off of any plastic or glass food containers before putting them in the recycle bin.

**03**

# **Community Support**

# Community Support

- WWF - group eco visits or other activities at one of our WWF Centres
- Welcome all organisations and groups to book
- CGS - eight CGSs progressively in operation across the territory.
- CGSs have collected over 7,000 tonnes of recyclables, received more than 1,250,000 visitors and conducted more than 5,900 environmental education events consisting of exhibitions, presentations, workshops and others.

# Mission of the Project

To raise the environmental  
awareness of domestic  
helpers and promote  
household waste reduction

# Community Green Stations(CGS)

Project	Kwun Tong CGS
Operator	Christian Family Service Centre
Location	27 Sheung Yee Road, Kowloon Bay

- Making good progress in providing logistic support for community recycling.
- Up to end of 2019, the CGSs have collected over 7,000 tonnes of recyclables,
- Received more than 1,250,000 visitors and conducted more than 5,900 environmental education events
- Exhibitions, presentations, workshops and others.

There will be a walk around tour video in our website link:

九龍灣啟仁街	近麗晶花園對出行人路	14:30 - 17:30	5/6, 12/6, 19/6, 26/6 (星期五)

由社區回收物品類別：  
● 已清洗之玻璃樽、塑膠樽、小型家電、電扇、低電壓/光管、隔紙(紙皮)、報紙書刊及辦公室用紙、紙包皮品、充電器、電池等，全部送交香港清潔回收，絕不寄賣或捐贈。  
● 舊書及衣物：以捐贈及以輪易物等方式安排重用。

\*時間表或因天氣不穩而有所更改，歡迎致電查詢或瀏覽「綠在觀塘」facebook專頁。

「獎勵計劃」推廣「惜物減廢」及「乾淨回收」的環境理念，居民可於社區回收站及「綠在觀塘」交來乾淨的回收物，所有回收物以重量計算，每0.5公斤(KG)可換一個「Green Coin」。如此累積。

# Project Timeline

## Phase 1

Mercury is the  
smallest planet

## Phase 2

Venus has a  
beautiful name

## Phase 3

Pluto is now a  
dwarf planet

## Phase 4

Jupiter is the  
biggest planet

## Where We Are Now

Mercury is the smallest planet in  
the Solar System

## Where We Want to Be

Jupiter is the biggest planet in  
the Solar System
